1 Processing of personal data

By registration of a domain and acceptance of the General Terms and Conditions for Registration of .tirol Domains ("General Terms and Conditions") the applicant authorises the registry to process personal and other data required for operation of the .tirol domain system. The applicant expressly agrees that the registry will use the data for operation of the system and for the WHOIS functions and that it will also forward the same to authorised persons in accordance with the ICANN Rules applicable from time to time. In this respect see also Clause 2.2 of the General Terms and Conditions of punkt Tirol GmbH.

Specific fields will be verified in the course of registration.

The applicant is entitled to access his personal data and have corrected errors, if any.

The applicant is obliged to fill in the fields stated in Clause 2 truly and must immediately inform the registry about any changes in his name, address, email address, phone or fax number. Any omission or delay in informing the registry about such changes may lead to termination of the registration contract.

2 Information collected for use

The following data will be stored:

domain name	registrant name
domain ID	registrant organisation
WHOIS server	registrant street
allocated URL	registrant town or city
update date	registrant province
date of preparation	registrant postal code/ZIP code
date of expiry	registrant country
registrar in charge	registrant phone number
registrar IANA ID	registrant phone extension
domain status clientDelete	registrant fax number
domain status clientRenew	registrant fax extension
domain status clientTransfer	registrant email address
domain status serverUpdate	Admin ID
registrant ID	Admin name

Admin organisation	Tech street
Admin street	Tech town or city
Admin town or city	Tech province
Admin province	Tech postal code/ZIP code
Admin postal code/ZIP code	Tech country
Admin country	Tech phone number
Admin phone number	Tech phone extension
Admin phone extension	Tech fax number
Admin fax number	Tech fax extension
Admin fax extension	Tech email address
Admin email address	Name server # 1
Tech ID	Name server # 2
Tech name	DNSSEC
Tech organisation	DNSSEC

The details must be those of the registrant. Registration via a trustee is not permitted.

3 WHOIS search function

3.1 Introduction

According to the ICANN Rules the registry must provide for a WHOIS search function, where, by entering a .tirol domain, information on the administrative and technical contacts responsible for managing the domain will be shown. Upon registration of a domain the details listed in Clause 2 will be published in the WHOIS database.

By going to the website of the registry and entering the domain in the WHOIS search function information about the domain and the registrant can be retrieved in accordance with the rules described below.

3.2 Purpose

The purpose of the WHOIS database is to provide information about the technical and administrative contacts responsible for managing the relevant .tirol domain that is as accurate and up-to-date as possible.

3.3 Identification of natural and legal persons; mandatory fields

For registration of a .tirol domain the listed details must be provided via an authorised .tirol registrar (RAA2013). Mandatory fields will be marked as such by the 2013RAA registrars and must be filled in.

For the name of the registrant there are two fields: the "name" field and the "organisation" field. Either both fields or only the "name" field may be filled in. If only the first field is filled in, it will be assumed that the registration is in the name of a private individual (natural person).

If the "organisation" field is filled in, it will be assumed that the registrant is a business.

3.4 Information published in the WHOIS database

All applicants must expressly accept the General Terms and Conditions, by which the applicant authorises the registry to publish personal data as stated in Clause 2.

3.5 Prevention of abuse of WHOIS data

The stored WHOIS data of the registry is protected by law. It shall only be used for technical or administrative requirements of internet operation and must not be stored electronically or in any other way without explicit written approval. In particular, use for advertising or similar purposes is strictly prohibited.

To prevent abuse of personal data made available in the Web-based WHOIS search function the registry will proceed as follows:

- Any person who starts a WHOIS search will be given an automatically generated random code, which the person must enter before s/he will receive the answer to her/his query. Provision of the code in the form of an image instead of in text form (CAPTCHA) prevents easy automation of the system for the purpose of data mining.
- No search functions for several criteria or other search functions to search for names, email addresses, addresses, fax numbers or phone numbers will be supported.

- Any person who starts a WHOIS search must first of all read and agree to the "WHOIS Legal Statement and Terms and Conditions". They inform the user about the fact that:
- the WHOIS services are provided for information purposes only;
- by starting a search the user agrees not to use the information for the following purposes: permitting, enabling or otherwise supporting transmission of unsolicited commercial advertising or other unsolicited correspondence, be it via email or in any other way; any kind of advertising or any harassment of the registrant by sending messages to him.

4 Copyright to the database

The .tirol WHOIS database is a database that is protected by copyright. Until further notice the internet community is provided with the option to search for specific domains free of charge. Punkt Tirol GmbH holds the sole right to reproduce, distribute, transmit or publish the database or parts thereof.
